

## It's Color Tyme! At Home

### Simple Supplies:

- Internet Connection
- Home Printer
- Paper
- Markers, Color Pencils, Crayons, or even Paint

\*Tip – In addition to the provided images in this coloring package, feel free to check out Top Coloring Pages at [www.topcoloringpages.net](http://www.topcoloringpages.net) for more cool designs ranging from superheroes to game characters and more!

### Steps: Because everything needs instructions!

- Download the Color Tyme Color Packet file from our website. Oh wait, you already did that since you're reading this right now.
- Print out the Color Tyme Packet.
- Set up your makers, color pencils, crayons, or paint (for you brave adults out there).
- When ready, call the kids in and let the inner artist within them express themselves.

### Fun Things to Try:

- Color Match Challenge – Depending on the image the child selects, find an image of the real-life item and challenge them to color their blank page to look exactly like the image.
- Opposite Color Challenge – Same as above, but this time, restrict what colors can be used. For example, color the sky without using blue. Then step back and watch how their imaginations explode onto the paper.
